# Remote Attestation
And
Geographic Evidence/Results

IETF124 - Montreal
RATS WG
Ramki Krishnan and Michael Richardson
YYYY-MM-DD TBD

Relevant Document(s)

- draft-richardson-rats-geographic-results (new)
- [draft-lkspa-wimse-verifiable-geo-fence](#) (discussed at IETF123: RATS+WIMSE)
- Potential document about Using PTP to estimate proximity (in-progress)
- draft-richardson-rats-pop-endorsement (discussed at IETF123)

Possible Document Architecture/Combinations: many docs

Rules for Collecting Evidence And Converting to Attestation Results

- pop-endorsement
- ptp-proximity
- verifiable-geofence

Rules for understanding Attestation Results, by RP

geographic-results

Could become appendix?

EAR?

Unified Workload Identity, With multiple Layers, including virtual and physical host

Document Architecture/Combinations: one Document, many appendix

Rules for understanding Attestation Results, by RP

geographic-results

Appendix: rules for Collecting Evidence/Converting to Attestation Results

| verifiable-geofence | ptp-proximity | pop-endorsement |

Considerations

- Different groups will have different needs, and putting too much together may confuse and/or slow review process
- But, a goal is to simplify the effort by Relying Parties, to have common code
  - Thus a common Attestation Results, arrived at by many different procedures
-

Discussion
